

Activity 1

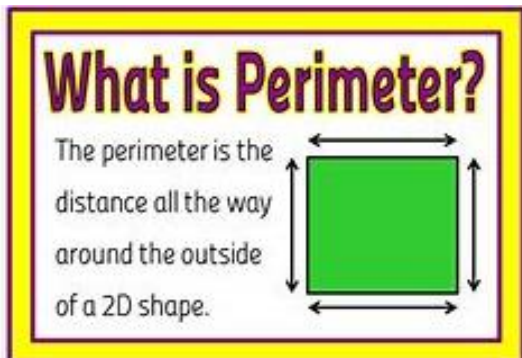

Set up a mini café in your living room. Price up different items that you can find and or make. Reduce your items by 25% or 50% and recalculate the prices.

E.g. If this can of soup cost £1, what would it be sold for if the price was reduced by 50%?

Activity 2

Calculate the perimeter of three areas of your house. E.g. rug, room, garden.

Activity 3

Bake a cake or something similar. Make sure you measure the ingredients carefully. Take a picture of what you bake.

There are some Easter treats on BBC good food.

Activity 4

- 1) Measure your current garden and draw a scale plan.
- 2) Design a new garden and draw a scale plan.
